PROFESSIONAL SUMMARY

Frontend Developer with demonstrated experience building responsive, cross-browser compatible web applications using HTML5, CSS3, JavaScript (ES6+), Bootstrap 5, and Tailwind CSS. Proficient in converting Figma and UI/UX designs into clean, semantic, and maintainable code with a strong focus on performance optimization and accessibility. Currently completing a certified Frontend Development program covering React.js and Next.js. Experienced with Git-based version control workflows and agile development practices. Seeking to contribute to a product-focused team that values clean UI and excellent user experience.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Bootstrap 5, Tailwind CSS

Tools & Platforms: Git, GitHub, Figma (design handoff), VS Code, Chrome DevTools

Core Concepts: Responsive Web Design, Cross-Browser Compatibility, CSS Flexbox & Grid, OOP, Data Structures & Algorithms, RESTful API Integration

PROJECTS

Games Arena — Responsive Gaming Landing Page GitHub · Live Demo

- Built a fully responsive dark-themed gaming landing page using **HTML5, CSS3, and Bootstrap 5**, achieving consistent rendering across all major browsers and screen sizes.
- Implemented **12+ reusable Bootstrap components** including navbar, cards, and modals, reducing code duplication and improving maintainability.
- Applied CSS smooth transitions and hover effects that improved overall visual interactivity of the UI.

Mudabbir — Personal Finance Dashboard GitHub · Live Demo

- Developed a responsive financial dashboard with **HTML5 & CSS3**, featuring structured data tables, summary cards, and an expense-tracking interface.
- Used semantic HTML5 elements and ARIA labels to ensure accessible markup, following **WCAG guidelines**.
- Achieved a clean, professional UI with consistent spacing, typography hierarchy, and color system across all sections.

The UX Review — Blog Landing Page GitHub · Live Demo

- Recreated a real-world UX blog design using **pure HTML5 and CSS3 — no frameworks** — demonstrating deep understanding of CSS layout techniques.
- Implemented complex layouts using **CSS Grid and Flexbox**, including a multi-column article feed, featured post section, and sticky sidebar.
- Ensured pixel-perfect fidelity to the original design across desktop, tablet, and mobile viewports.

DJI Mavic 4 Pro — Product Landing Page GitHub · Live Demo

- Developed a high-converting product landing page using **HTML5 & CSS3** with a focus on visual hierarchy, typography, and modern product showcase design.
- Implemented a fully responsive layout that adapts seamlessly from **320px mobile** to **1440px desktop** viewports.

EDUCATION

Bachelor of Engineering — Systems & Computer Engineering | Oct 2023 – Present

Al-Azhar University, Faculty of Engineering · Cairo, Egypt

- Core coursework: Java programming, OOP, Data Structures & Algorithms, Database Systems, Digital Logic Design, and Electronics.
- Developed several academic software projects applying OOP principles and algorithmic problem solving.

CERTIFICATIONS

Frontend Development with React & Next.js — Route Academy | Expected: September 2026
